SUMMARY

UI/UX Designer with 1.5+ years of professional experience crafting user-centered digital products across web and mobile platforms. Experienced in developing 10+ web and mobile applications with a strong emphasis on usability, accessibility, and business impact. Skilled in Figma, prototyping, and UX strategy, with the ability to translate complex requirements into intuitive digital experiences across 5+ industries.

WORK EXPERIENCE

Digitali360-Marketing Agency October 2024 – Present | Hyderabad
UI UX Designer

- Developed user flows, wireframes, and high-fidelity prototypes for 5+ web and mobile applications.
- Collaborated with a cross-functional team of 8+ to deliver business-aligned design solutions.
- Built a design system with 30+ reusable components, improving consistency across 3+ platforms.
- Conducted 10+ usability testing sessions with 6–8 participants each to validate design decisions.
- Managed 3+ concurrent client projects, delivering conversion-focused designs on schedule.

PROJECTS

Test Approach March 2026 – March 2026
Website Redesign

- Revamped 10+ pages raising the System Usability Scale score from 54 to 81.
- Fixed 6 critical friction points identified using Nielsen Norman's 10 usability principles.
- Improved information architecture across 6 navigation sections lowering user friction by 35%.
- Provided responsive, accessible Figma designs across 3 breakpoints optimized for conversion.

BotNBolt February 2026 – February 2026
Website Design

- Planned 12 wireframes across 4 product categories including automotive and home tools.
- Simplified checkout flow from 6 steps to 3 steps improving purchase completion rate.
- Eliminated 4 unnecessary steps lowering friction across the end-to-end purchasing journey.
- Crafted intuitive category navigation supporting quick product discovery across all sections.

Madroidix Technologies December 2025 – December 2025
Website Design

- Developed 10+ pages with 25+ UI components and a clear 5-section information architecture.
- Decreased user drop-off by 35% through optimized navigation and content structure.
- Translated business requirements into responsive, high-fidelity interfaces across 3 screen sizes.
- Organized content into logical sections improving task completion and lessening confusion.

Sansai Groups September 2025 – October 2025
Website Redesign

- Remodeled 12+ screens across 3 platforms resolving 6 key usability issues.
- Simplified user flows from 6 steps to 3 steps improving engagement significantly.
- Restructured navigation improving content discoverability across 4 main content areas.
- Generated 3 interactive prototypes ensuring consistent experience across all devices.

Alanati Pindivantalu May 2025 – June 2025
Website Design and Mobile Responsive Design

- Planned 14+ screens across 6 product categories with 4 structured user journeys.
- Decreased decision-making steps by 30% by identifying and fixing 5 key pain points.
- Provided responsive layouts across 3 breakpoints — desktop, tablet, and mobile.
- Crafted intuitive navigation flow improving product discovery and ordering experience.

Mahavir Skoda February 2025 – March 2025
Website Redesign

- Restructured 8 pages; identified 7 usability issues via heuristic evaluation.
- Lowered navigation click depth by 40% with a streamlined 3-level structure.
- Developed 15+ wireframes and high-fidelity prototypes for desktop and mobile.
- Modernized visual design improving accessibility and overall browsing experience.

Proppins

October 2024 – January 2025

App and Website Design

- Crafted 40+ screens with 2 distinct user flows — buying and renting journeys.
- Implemented 10 search and filter options simplifying property discovery by location and budget.
- Decreased browsing complexity by 40% by streamlining the property comparison experience.
- Established separate decision-making flows reducing cognitive load for first-time users.

Entrepreneur Analysis Information for Business Opportunity

February 2024 – May 2024

- Developed an 8-screen dashboard with 5 modules for business opportunity analysis.
- Generated 3 data visualization types — bar charts, trend graphs, and comparison tables.
- Lowered data interpretation time by 40% through structured layout and clear visual hierarchy.
- Planned user authentication flow and integrated seamlessly with Django backend system.

INTERNSHIPS

UI/UX Intern

June 2024 – September 2024 | Hyderabad

Digital i360- Marketing Agency

- Developed 10+ wireframes, prototypes, and high-fidelity UI screens per project across 4 client projects using Figma.
- Collaborated with a cross-functional team of 6+ developers and product managers to implement user-centered design solutions.
- Assisted in 5+ usability testing sessions incorporating feedback across 2 design iteration cycles per project.
- Optimized layouts, navigation, and accessibility across 3+ platforms lowering key task completion time by 25%.

Developer Intern

February 2024 – May 2024 | Hyderabad

Intellicloud App

- Built a business data management system using Django and Python handling 500+ records within 8 weeks.
- Implemented user authentication and data handling features across 3 system modules improving functionality.
- Collaborated on full-stack development presenting a complete web application with structured frontend and backend.
- Improved user interaction by initiating 4 data workflows and enhancing usability across the admin dashboard.
